

**Print Management
Made Simple**

OCM Print Management

OCM introduces advanced reporting tools which through comprehensive capture capability will provide your business with clear visibility of its document production and workflow costs.

Armed with this new knowledge organisations can now begin to review and question their output requirements and document workflows, and through OCM enforce controls and processes in how documents are produced within business, thus providing significant cost savings in capital expenditure and reduction in total cost of ownership across the company.

OCM Sharp OSA Device Management

As a true solutions provider, OCM has designed bespoke software solutions that can introduce immediate cost recovery including the ability to bill back all document workflow; printing, copying, faxing and scanning which can help your organisation to operate more efficiently such as maximising device utilisation while providing a follow me secure print facility.

"By combining OCM's web based document and print management software together with Sharps Open Systems Architecture (OSA 3), we have created a unique industry leading solution that simply offers you the advantages of convenience, productivity and economy in ways that no other can match".

Web Based Central Management

The OCM Sharp OSA 3 Embedded Solution with web based central management really helps Sharp customers to realise the full cost management potential seamlessly integrated within the versatile Sharp OSA3 development platform. Whether you are a school, law firm or corporate customer the OCM Web console can be easily configured to meet your specific billing and cost recovery requirements. The OCM Sharp OSA3 management solution transforms your Sharp multifunction device into the hub of an adaptive infrastructure for accurate cost management, secure and mobile print release, and broad-based device management throughout your organisation.

OCM Follow Me Secure Print

OCM Sharp OSA Embedded Follow Me Secure Print offers users the huge benefit of walking up to any networked Sharp device to securely release all or any one of their "locked" print jobs with the added flexibility of being able to bill back secure print documents by department, client or cost code.

Print Management
Made Simple

OCM Sharp OSA Device Management

Billing Back Document Output Costs

Never has it been made so easy, OCM offers you the ability to bill back all print, photocopy, fax and scan jobs by a specific user client or cost centre. The easy-to-use interface ensures all jobs are automatically prompted for the user to key in a specific cost centre number or by means of a filter option choose from a divisional code or project code.

Detailed Audit Reports

OCM's Web Management Console includes a comprehensive web based reporting tool. At a touch of a button you can generate detailed reports; auditing and measuring user, device, server, client activity.

These reports are all instantaneous, where the report is based upon the most recently generated user activities captured by the OCM OSA 3 device auditor. The captured data can be exported in several difference formats including MS Word, MS Excel, HTML and PDF.

Automatic Device Discovery and Meter Reading

The OCM Sharp OSA 3 global setting web console centrally manages all of the Sharp devices meter reading counters and will automatically take the meter reading of each device including print, photocopy, fax and scan volumes, each reading also includes model, serial number and IP address. Once all of the data has been captured, the OCM scheduler will automatically email the captured meter reading data and output volumes to an email address of your choice where detailed meter reading reports can be generated or if you are a reseller the device meter readings can be automatically uploaded to your billing system.

Integrated Print Management

In summary OCM is a revolutionary integrated document auditing and print management solution that allows administrators to monitor and control the use of all printers, photocopiers and multifunction devices throughout an entire organisation. OCM can provide an immediate return on investment, regardless of whether it is used as a general office cost recovery system or a cost centre billing system.
