- ✓ **Comprehensive Turn Key Solutions** tailored for small business up to enterprise levels.

OCM Touch Screen

The OCM touch screen management console combines the power and flexibility of OCM's central management software with integrated PC touch screen hardware to create an impressive interactive computing solution. Powered by a high-performance, low-power embedded processor, with robust standard I/O features including 10/100Base-T Ethernet, two serial ports, and two high-speed USB 2.0 ports. The OCM touch screen management console offers end users flexibility, ease of use and print output management at the touch of a finger!

OCM Print Management

By combining OCM's web based document and print management software technology together with the OCM touch screen management console we have created a unique industry leading solution that simply offers you the advantages of convenience, productivity and economy in ways that no other can match. As OCM is a manufacturer independent solution provider the OCM touch screen management console is a generic solution and is compatible with all leading multifunction device manufacturers.

Through increased centralised device management; which offers printing and photocopying, a high proportion of documents distributed are not accurately managed or in turn accurately billed back to users, cost centre's or clients. As a true solutions provider, OCM has designed and developed the OCM touch screen management console to cater for this market requirement. When implemented the OCM touch screen management console can introduce immediate cost recovery which can help any organisation to operate more efficiently such as maximising device utilisation while providing a follow me secure print facility.

OCM Touch Screen

Follow Me Secure Print

The OCM touch screen management console also offers Follow Me Secure Print capabilities allowing users the huge benefit of walking up to any networked multifunction (associated to OCMs management console technology) device to securely release all or any one of their secure print jobs even if the initial chosen device is "off-line, walk up to another device and automatically release your secure print documents on that device.

In summary OCM's touch screen management console is a revolutionary integrated document auditing and print management solution that offers the ability to centrally manage and control the use of multifunction devices throughout an organisation including the ability to recover and bill back document output costs.

Document Output Reports:

OCM's Web Management Console includes a comprehensive web based reporting facility. At a touch of a button you can generate detailed reports; auditing and measuring all user and device activity.

These reports are all instantaneous, where the report is based upon the most recently generated user activities captured including all photocopies generated and all secure documents printed. Allowing senior management to create usage, cost recovery and trend reports.
