## OCM Web Reports

OCM's Web Management Console includes a comprehensive web based reporting tool. At a touch of a button you can generate detailed reports; auditing and measuring user, device, server, client, etc activity.

These reports are all instantaneous, where the report is based upon the most recently generated user activities captured by the OCM print and photocopy auditors. The reports are manufacturer independent with detailed and summary device and user trend reports.

OCM's Web Reports can be customisable to meet with partner specifics.

### OCM Print Management

OCM introduces advanced reporting tools which through comprehensive capture capability will provide your business with clear visibility of its document production and workflow costs.

Armed with this new knowledge organisations can now begin to review and question their output requirements and document workflows, and through OCM enforce controls and processes in how documents are produced within business, thus providing significant cost savings in capital expenditure and reduction in Total Cost of Ownership across the company.

### Generate Reports By

- Print Analysis
- Cost Recovery
- Secure Print Output
- Print Centre Production
- Central Fleet Management
- Consumable Management
- Engineering Part Status
- Device Meter Readings
- Device Usage by Locally Attached Printers

**Print Management  
Made Simple**

### OCM Offers Flexibility

"Our product portfolio incorporates a flexible range of consultancy and tailored software solutions that will pay dividends for your business. We can conduct an audit review of your document workflow and output, once complete we will provide you with short and long term strategies to help you work smarter and save money. Or we can give you the tools to do it yourself. Whichever solution you choose, we'll make sure it's the right one for you"

## OCM Web Reports
